SUMMARY

Staff Backend Engineer with 15+ years of experience scaling robust distributed systems and microservices. Expert in Java and cloud-native architectures (AWS), with a proven track record of leading high-impact initiatives and driving technical excellence. Adept at architectural ownership, optimizing system performance, and mentoring cross-functional teams to deliver scalable infrastructure. Committed to clean code principles and data modeling to support sustainable product growth.

EXPERIENCE

Staff Engineer

Yieldmo

November 2019 - Present, New York, NY, United States

- Partnered with data and front-end teams to guarantee the robust design and successful launch of video ad functionalities, enhancing the core platform.
- Investigated and debugged an unusual production issue impacting viewability metrics, successfully reducing discrepancies by 4-5% through cross-domain problem-solving.
- Achieved a 2% reduction in CPU usage for a high-throughput system by analyzing performance metrics and refining core algorithms.
- Enhanced ad signal accuracy through data analysis and cross-team partnerships, directly contributing to a 5% uplift in platform ad spend.
- Initiated and executed the implementation of a revamped data provider library, applying clean architecture patterns to minimize future development cycles and enhance code extensibility.
- Engineered comprehensive code reviews and best practices adoption to drive higher quality software releases.

Senior Software Engineer,

Workmarket, an ADP Company

October 2018 - November 2019, New York, NY, United States

- Designed and implemented scalable features for financial services applications using advanced backend technologies.
- Initiated team knowledge-building activities emphasizing RxJava.
- Designed an algorithmic model for job description classification utilizing machine learning concepts.
- Demonstrated technical excellence by optimizing backend system code per newfound understanding of the underlying libraries.

Senior Software Engineer

Workiva

June 2016 - October 2018, Ames, Iowa, United States

- Utilized Java and Spring Boot for the development of XBRL product features, enhancing system versatility within a microservices setup.
- Utilized creative problem-solving skills to support and update an Adobe Flash legacy tool, integrating modern backend technologies to improve performance and user experience.
- Enforced best practices, enforcing code quality via impactful code reviews, and documentation as necessary.
- Contributed to collaborative knowledge sharing sessions on microservices architecture, fostering an understanding of modern software design principles.

Senior Applications Engineer

Oracle India

October 2010 – July 2014, Hyderabad, India

- Engineered enhancements in a supply chain orchestration project, implementing ADF and SOA frameworks.
- Guided a group of contractors by implementing structured mentoring strategies, utilizing ADF and SOA technologies.
- Promoted effective communication channels among cross-functional teams, leveraging ADF and SOA for successful project delivery within 6 months.

Assistant Systems Engineer

Tata Consultancy Services

July 2008 – October 2010, Hyderabad, India

- Deployment and maintenance of enterprise-level applications, ensuring seamless integration and functionality across diverse operating environments.
- Achieved Sun Certified Java Programmer certification by mastering core Java concepts along with application in real world scenarios.
- Recognized amongst top 100 participants in a company wide Algorithm Design Contest.

EDUCATION

Master of Science: Computer Science

Iowa State University • Ames, IA • 2016 • 3.82

- Thesis: Using node ordering to improve Structure MCMC for Bayesian model averaging
- Coursework focused on Artificial Intelligence/ Machine Learning.

Bachelor of Engineering: Computer Engineering

Thapar University • Patiala, Punjab, India • 2008 • 7.96/10

CERTIFICATIONS

Sun Certified Web Component Developer for the Java Platform, EE 5

June 2010

Sun Certified Programmer for the Java Platform, SE 5.0

March 2009

INVOLVEMENT

Software Developer

Iowa State University • Agronomy Department • June 2015 – September 2015

- Developed a prototype data acquisition tool utilizing Raspberry Pi and Arduino to collect images from multiple cameras for agronomic research.
- Recognized as an impactful contribution to the ongoing research reducing the time from ideation to application by ~25%.

SKILLS

Skills 1: Expert in Java, Backend Development

Skills 2: Strong understanding of SQL, Python, Docker, Spring Boot, Microservices, GRPC

Working Knowledge: AWS, Kafka, Golang, Django, C++, R, Machine Learning
